About BuildingPro

Founded in 2000, BuildingPro are professional award winning building consultants fully licensed and insured providing building, pest, maintenance, pre-purchase and pre-sale building inspection services for residential and commercial buildings in the Brisbane area.

Our prompt and professional **Pre-purchase building and pest inspection service** will assist you in your latest property purchase.

The Building & Pest Inspection

When you buy a property in Queensland, the standard contract provides for a limited period to obtain a satisfactory building and pest inspection. If the building and pest reports are not satisfactory, you may have the option to withdraw from the contract or utilize the inspection reports to re-negotiate. **Your decision to buy or not to buy may be based on our reports.** You can rely on us to provide you with the right advice so that you can make a confident decision that could save you tens of thousands of dollars!

We use the latest technology and equipment such as Termatrac, thermal imaging cameras and moisture meters. The reports can be emailed to you within 24 hours of the inspection. The reports include digital photos and detailed descriptions of the type and location of any defects identified. We can assist you in understanding the significance of identified defects by explaining any issues raised.

Find out why we've had over 6,500 happy customers.

The Cost

Our fees vary depending on the type, age and location of the property. Call us on 07 3311 2273 for a quote.
